

CALL FOR PAPERS

Global Crisis and Sustainable Development : New Public Governance and Local Community Innovation

BK21 Four Education and Research Group on Local Community and Innovation and New Public Governance in an Era of Global Crisis, Yonsei University Mirae Campus and Institute for Policy Study in Ethiopia will hold an international conference on “Global Crisis and Sustainable Development: New Public Governance and Local Community Innovation” on 27 January 2023. This conference will attempt to share and discuss various research on analyzing some unique and common social problems and solutions of developing countries at all different levels from the perspective of new public governance and innovative solutions in responding to current global crises. The major objective of the conference is to engage experts, practitioners and scholars in all fields in Ethiopia, the other African countries and Korea. Through this conference, opportunities for research cooperation between Korea and developing countries particularly focusing on African countries will be provided.

We welcome papers that focus on local innovative initiatives and actions as well as national policies for solving complex problems such as inequalities, unemployment, care crisis, regional disparities, infectious diseases, and climate change. The following is a list of the conference sub-themes. Please submit an abstract for the session that you think best fits one of the following:

Sub-Themes

Global/National Economic Crisis
Climate Change
Post-Covid 19/Public Health
Poverty and Inequalities
Gender Equality
Digital Inclusion
